Hanover Precautionary Boil Water Advisory – Update #1

HANOVER, ON – The precautionary boil water advisory is still in effect and is a proactive safety measure implemented by the Town of Hanover. Our municipal water treatment internal systems are working and therefore, prompted the precautionary advisory due to an adverse test result received.

It is understood that residents are concerned about the safety of their drinking water. The Town's first priority is ensuring the safety of our water supply. All proactive necessary steps, analysis and agency communications have been implemented. Residents and consumers using water provided by the Town of Hanover water supply system should continue to heat their water to a rolling boil for 1 minute before consuming for drinking or cooking or use an alternate water source (ie. bottled water).

Our staff have taken the necessary action and water resampling tests have been expedited to our accredited lab. As soon as results are known, an update will be shared via our local media, Town website and social media.

Grey Bruce Public Health website provides information and resources with respect to precautionary boil water advisory. The website link is <https://www.publichealthgreybruce.on.ca/Your-Environment/Safe-Water/Public-Drinking-Water#1807108-precautionary-advisory>

A further update will be issued this afternoon.
