

COVID-19: CLEANING WORKSTATIONS

Detailed cleaning and disinfectant protocols are necessary to maintain a healthy working environment.

The key is to clean frequently using the correct materials

CLEANING MATERIALS

- ▶ Spray Bottle of Disinfectant
- ▶ Paper Towel
- ▶ Hand Sanitizer
- ▶ Gloves & Safety Glasses

HOW TO CLEAN

1. Put on gloves
2. Wash surface with soap and water (let dry)
3. Spray disinfectant solution
4. Allow to set for 60 sec., then wipe with disposable rag
5. Dispose of gloves
6. Wash hands

CLEANING METAL SURFACES / ELECTRONIC DEVICES

Avoid spraying the solution in proximity of gage / device; can lead to overspray

WHAT TO CLEAN

- All tools used
- Desk
- Locker
- Chair
- Other High Touch Points
- Keyboard/Mouse
- Cabinets
- Radios used
- Phone

The disinfectant solution could damage metal gage surfaces and electronic devices.

WHEN TO CLEAN

- ▶ Mid-point of shift
 - ▶ End of shift
- Always clean and disinfect frequently touched surfaces.

* Follow the **COVID-19 Cleaning Protocol** for specific areas to clean and disinfect.
