

### Project Background

In 2021, a Municipal Servicing Needs Assessment was completed, which identified that the Hanover Wastewater Treatment Plant (HWWTP) has reached 80%-85% capacity. This triggered the initiation of the Schedule 'C' Municipal Class Environmental Assessment (Class EA) project to plan for the management of wastewater flows in the Town as development proceeds. Upgrades or expansions of the HWWTP are needed to ensure sufficient wastewater treatment capacity for existing residents and businesses in urban areas. Additionally, it is necessary to accommodate future growth, including the developable land area beyond the municipal boundary. This Class EA will determine the preferred design alternative to increase the treatment capacity of the HWWTP.

### Public Information Centre

Public consultation is a key component of this study and will assist in ensuring that members of the community and stakeholders have an opportunity to learn about the Class EA and provide input and feedback.

The purpose of the Public Information Centre #1 (PIC#1) is for the community to review the study background, existing conditions, problems and opportunities, preliminary alternative solutions, and next steps in the study.

A virtual pre-recorded PIC presentation will be available to view as of Thursday, May 2<sup>nd</sup>, 2024 at <https://www.hanover.ca/wastewater-treatment-plant-upgrades-class-ea>. Print copy of the PIC material can be reviewed in-person at the Town's office during regular business hours. Comments relating to the PIC#1 will be incorporated into the final report.
